DESIRE - Disseminate Educational Science,
Innovation and Research in Europe

Share your experiences with us

The DESIRE project organises events to facilitate the sharing of experience between participants. Events are organised in five categories which corresponds to the five target groups of the project, namely: project managers, teachers, policy-makers, organisers of science events and science centers and museums professionals.

About DESIRE

The primary objective of DESIRE is to identify how new project results on methods and practises in science education can reach teachers and schools more efficiently. The project started in December 2011 and will run for two years.

We invite science teachers, STEM professionals, science project planners, policy-makers, organisers of science events and organisers of activities and expositions in museums to tell about their experience in accessing or disseminating tools and methods that have helped know about project results. The sharing of practical experience will help us identify the best practise dissemination models for project results.

If you wish to be informed about the upcoming activities organised by the DESIRE project we welcome you to subscribe to our mailinglist:
